PROJECTS

Personal Portfolio-Website
2022

Aim and Objective
- The purpose of the website is to showcase my work and abilities.
- The website is basically on frontend development where I used all the frontend technologies HTML5, CSS3 and Javascript.
- The website has 5 sub sections like Home, About, Project, Blog and Contact page.
- Also I enable a download resume option using button tag where I linked my resume so that whenever a person visit my website can download my resume for reference.
- The project is completely done by myself and it was a great experience since during the making of my project I learnt some of the advance topics of CSS and Javascript.

Crypto Tracker
2021

It basically show us the latest crypto prices.
- Technologies that are used is HTML5, CSS3 and Javascript.
- Since it show us the latest crypto price it is because I fetched API that tracks the latest crypto rates.

TODO-LIST
2020

It is a simple app where we can checklist our day to day activites made using Javascript where it can function crud operation like Create, delete, update and remove.
